EEA Workplace Safety Award

The award recognises initiatives that:

- Promote safety excellence in the electricity supply industry workplace.
- Raise awareness and ownership of health and safety issues and practices in the workplace.
- Reduce accidents in the electricity supply industry.
- Encourage staff to participate in improving safety practices and procedures.
- Publicise ideas, procedures and training which provide for a higher standard of safety in our industry; and encourage debate on safe working procedures within industry and each company.

Public Safety Award

The award recognises initiatives that:

- Raise awareness of electrical safety issues in the local community.
- Reduce accidents to the public which involve electricity supply industry assets.
- Improve public understanding or awareness of electrical safety issues around electricity supply industry assets.
- Encourage industry and the public to think about and participate in electrical safety initiatives. (duplication)
- Publicise ideas, procedures and programmes which deliver a high standard of public awareness of electrical safety.
- The development of new or improved types of public safety promotion or information
- The introduction of new or improved safety education methods, practices or procedures
- New ways of encouraging a positive approach to electrical safety
- Any other new aspect or suggestion which conforms to the objectives

Leader in Safety

The award recognises individuals that:

- Promote safety excellence in the electricity supply industry workplace.
- Raise awareness and ownership of health and safety issues and practices in the workplace.
- Reduce accidents in the electricity supply industry.
- Encourage staff to participate in improving safety practices and procedures.
- Publicise ideas, procedures and training which provide for a higher standard of safety in our industry; and encourage debate on safe working procedures within industry and each company.
